20/17 Nguyễn Xiển, Nha Trang, Khánh Hòa

EXPERIENCE

SweetSoft

Intern (20/10 - 13/1)

Participated in developing a **Technical Support Ticket Management System** using **ASP.NET**.
Implemented core features including **ticket creation, assignment, status tracking, and user management**.
Worked with **C#, ASP.NET MVC, SQL Server, HTML, CSS, and JavaScript**.
Assisted in **bug fixing, testing, and system maintenance**.
Collaborated with team members to **enhance system functionality and performance**.

PROJECTS

Support ticket website

Developer (20/10 - 13/1)

Group project
Developed an **ASP.NET MVC** Technical Support Ticket system using **C#** and **SQL Server**.
Implemented core **CRUD** features for ticket management, status tracking, and user authorization.
Integrated UI with backend logic and collaborated on system optimization, debugging, and deployment.

CLOTH STORE WEBSITE

Developer (10/3 - 20/5)

TECHNICALS SKILLS

Programing languages

C++, C#, Java, Javascript, Python

Frameworks & Technologies

ASP.NET / **ASP.NET MVC**
RESTful APIs
Android Development (basic)

Database

SQL Server
Basic database design

Web Technologies

HTML, CSS
JavaScript (basic)

Tools & Concepts

Git / version control (basic)
MVC architecture
Basic debugging & testing
Basic IT support & troubleshooting

SOFT SKILLS

Time management

Teamwork and collaboration

Responsible and proactive attitude

Personal project

Developed a **Clothing Store** web application using **ASP.NET MVC**, **C#**, and **SQL Server**.

Developed a **Clothing Store** web app using **ASP.NET MVC**, **C#**, and **SQL Server**.

Implemented **CRUD** for product/category management and core order processing logic.

Integrated **HTML/CSS/JS** with backend controllers for a functional shopping experience.

KARAOKE BOOKING SYSTEM

Developer (2026 - 2026)

https://github.com/trungtin03/Karaoke_Booking_site

Tech Stack: ASP.NET MVC 5, Entity Framework 6, SQL Server, LINQ, Tailwind CSS

Smart Booking Engine & Inventory Logic: Engineered a robust booking algorithm using **LINQ** to detect time overlaps and manage multi-room inventory (e.g., 5 rooms per type), effectively preventing double-booking conflicts.

Real-time POS & Dynamic Billing: Developed a Point of Sale (POS) dashboard for staff to monitor room status (Vacant/Booked/Active) and calculate final bills based on **actual duration**, automatically handling overtime and pricing logic.

CMS & Role-Based Security: Implemented **Role-Based Access Control (RBAC)** to secure Admin/User resources and built a Content Management System (CMS) with secure file uploading and automated data mapping.
